Re: WBI Energy Transmission, Inc.
Bakken East Pipeline Project
Request to Initiate NEPA Pre-filing Process
Docket No. PF26-___-000

Dear Ms. Reese:

WBI Energy Transmission, Inc. (WBI Energy), hereby requests approval from the Federal Energy Regulatory Commission (Commission or FERC) to initiate the Commission's National Environmental Policy Act (NEPA) pre-filing review process for its planned Bakken East Pipeline Project (Project). This request is submitted in accordance with 18 C.F.R. § 157.21(b) of the Commission's regulations. Upon completion of the pre-filing review, WBI Energy will file an application with the Commission for authorization to construct and operate the Project under Section 7(c) of the Natural Gas Act (NGA). WBI Energy is evaluating using the expediated review under NEPA for the Project consistent with the opt-in fee process and schedule established pursuant to Section 60026 of the One Big Beautiful Bill Act.

Pursuant to 18 C.F.R. § 157.21(c), representatives of WBI Energy met with Commission Staff on December 4, 2025, to review the Project and WBI Energy's progress towards obtaining the information required for use of the pre-filing process.

The Project is being planned to serve new power generation, industrial facilities, and local distribution company demand in central and eastern North Dakota based on the results of a non-binding open season held in late 2024/early 2025. The Project will interconnect with WBI Energy's existing natural gas pipeline system and other interstate pipelines along the planned route serving the Midwestern United States. The initial design of the Project includes approximately 350 miles of mainline pipeline and approximately 90 miles of lateral pipelines, new and modified compression, and various measurement and interconnect facilities in North Dakota. WBI Energy intends to hold a binding open season in the first quarter of 2026 after which final facility design will be determined. It is anticipated the Project will be constructed over two construction seasons and will be placed in service in two phases. The first phase of the Project has a target in-service date of November 2029, and the second phase has a target in-service date of November 2030.

In accordance with the Commission's pre-filing procedures, WBI Energy submits the following information regarding the Project to initiate the pre-filing process:

1. Project Schedule (18 C.F.R. § 157.21(d)(1))

The desired milestone dates for the Project are as follows:

Project Milestones WBI Energy Transmission, Inc. Bakken East Pipeline Project	
WBI Energy submits request to use pe-filing process	December 2025
FERC staff issues Director's Notice of approval	January 2026
WBI Energy conducts public open houses	February 2026
WBI Energy files NGA Section 7 Application	July – September 2026
FERC staff issues Environmental Document	July 2027
WBI Energy requests Certificate	September 2027
FERC staff issues Notice to Proceed	November 2027 – February 2028
WBI Energy places Phase 1 facilities in service	November 2029
WBI Energy places Phase 2 facilities in service	November 2030

2. Zoning and Availability (18 C.F.R. § 157.21(d)(2))

Not applicable. The Project does not involve a liquefied natural gas (LNG) facility.

3. Request Use of the Pre-filing Process (18 C.F.R. § 157.21(d)(3))

WBI Energy is requesting to use the pre-filing process to allow agencies, affected landowners, and other stakeholders to work cooperatively with WBI Energy and Commission staff to identify and address environmental issues prior to the filing of the Certificate application. The open and proactive communication associated with the pre-filing process will allow WBI Energy to prepare a Certificate application that more accurately and adequately addresses stakeholder concerns. Early stakeholder engagement is consistent with WBI Energy's commitment to building and maintaining strong relationships with the communities in which it operates.

4. Project Description (18 C.F.R. § 157.21(d)(4))

The current design of the Project consists of approximately 350 miles of new mainline pipeline consisting of 36 or 42-inch pipeline from WBI Energy's existing Elkhorn Creek Compressor Station to central North Dakota and 24, 30, and/or 36-inch diameter pipeline from central North Dakota to its existing Mapleton Compressor Station. Certain natural gas lateral pipelines from processing plants within the Bakken region, as well as an approximate 9-mile-long 8-inch-diameter lateral pipeline in Barnes County and an approximate 82-mile-long 20-inch-diameter lateral pipeline in Barnes, Lamoure, and Dickey Counties are included in the current design. Additional lateral pipelines may be included after the binding open season. Potential compression includes the construction of two greenfield compressor stations and additional

compression at three existing compressor stations. Various measurement and interconnect facilities would also be constructed. An overview map is attached as Exhibit A.

Design and engineering for the Project are ongoing; therefore, plot plans for compressor stations and various measurement and interconnect stations are not available at this time. WBI Energy anticipates filing plot plans for these facilities with the Certificate application.

5. List of Relevant Federal and State Agencies in the Project Area with Permitting Requirements (18 C.F.R. § 157.21(d)(5)).

Exhibit B contains a table listing relevant federal and state agencies with regulatory review or permitting authority over the Project including address and contact information. Exhibit B also lists Indian Tribes that have or may have an interest in the Project. The table identifies the permit or approval required from each agency; verifies that each agency has been contacted by WBI Energy; and indicates if the agency is expected to participate in the pre-filing process. WBI Energy plans to file all major federal permits concurrently with the Certificate application.

WBI Energy sent introductory Project outreach to the U.S. Army Corp of Engineers (USACE) and U.S. Fish and Wildlife Service (FWS) in March 2025 followed by meetings and discussions to gather information on resources in the Project area. Additionally, outreach letters providing information about the Project were sent to Indian Tribes in April 2025. The letters to the Indian Tribes noted that the Project is subject to review under section 106 of the National Historic Preservation Act, FERC is responsible for government-to-government consultation, and that archaeological surveys would begin along the planned pipeline route in the summer of 2025. WBI Energy also solicited the Indian Tribes' participation in the archaeological field surveys.

Project introduction letters were mailed to all agencies listed in Exhibit B by October 30, 2025. As a follow-up to the Project introductory letters, WBI Energy has started contacting the agencies to determine their interest in participating in the pre-filing process and will continue to communicate with them throughout the Project.

6. List and Description of the Interest of Other Persons/Organizations Contacts about the Project (18 C.F.R. § 157.21 (d) (6)).

Exhibit C contains a table listing federal, state, and local officials, and other interested parties identified by WBI Energy. These stakeholders are in addition to the agencies in Exhibit B. The table provides address and contact information for each stakeholder. WBI Energy will send Project introductory letters to these stakeholders prior to public open houses. A Public Participation Plan has also been developed to identify and inform stakeholders who may be affected or have an interest in the Project. The Public Participation Plan is provided in Exhibit D.

7. Project Work Already Done (18 C.F.R. § 157.21(d)(7))

Stakeholder Engagement: WBI Energy has identified the stakeholders listed in Exhibits B and C. WBI Energy has engaged with the agencies and Indian Tribes listed in Exhibit B as explained above and the stakeholders listed in Exhibit C will be notified prior to the public open

houses. WBI Energy will follow up with these stakeholders in the upcoming weeks. WBI Energy has also prepared a Public Participation Plan for the Project (see Exhibit D).

Agency Engagement: In April 2025, the FWS provided Geographic Information System (GIS) data for various FWS easements (e.g., grassland, wetland, waterfowl production areas) in the Audubon, Chase Lake, Long Lake, and Valley City Wetland Management Districts. Preliminary discussions with the U.S. Forest Service (USFS), Bureau of Reclamation, and the Bureau of Land Management (BLM) regarding surveys on federal lands took place between April and September 2025. WBI Energy will schedule an interagency call in early 2026 between the USACE, USFS, and BLM to discuss BLM involvement and issuance of a right-of-way easement. Additional activities conducted to date to engage regulatory agencies are described in Section 5 above. Information regarding agency engagement is also provided in Exhibit B.

Tribal Engagement: In response to the April 2025 outreach letter and subsequent communications, the following twelve Indian Tribes expressed interest in participating in cultural surveys for the Project: Crow Tribe of Montana; Flandreau Santee Sioux Tribe of South Dakota; Fort Belknap Indian Community; Northern Cheyenne Tribe; Rosebud Sioux Tribe; Sisseton-Wahpeton Oyate of the Lake Traverse Reservation; Spirit Lake Tribe; Standing Rock Sioux Tribe; Three Affiliated Tribes of the Fort Berthold Reservation (MHA Nation); Turtle Mountain Band of Chippewa Indians; Upper Sioux Community; and Yankton Sioux Tribe of South Dakota. WBI Energy held a virtual meeting with interested Indian Tribes on September 18, 2025, to discuss the Project, tribal participation, and the cultural survey methodology. Tribal participation in cultural surveys began on September 23, 2025.

Land/Right-of-Way: WBI Energy has identified landowners along the planned route through publicly available data and courthouse research in each of the counties crossed by planned Project facilities. WBI Energy began contacting landowners in January 2025 and held invitational landowner information meetings in Watford City, Killdeer, and Beulah, North Dakota on November 3, 4, and 5, 2025, respectively and Bismarck, Ellendale, Jamestown, and Casselton, North Dakota on November 17, 18, 19, and 20, 2025, respectively. A list of affected landowners will be included with the stakeholder mailing list to be filed with the Commission staff within 30 days of receiving Commission approval to use the pre-filing process in accordance with §157.21 (f)(4).

Route and Facility Planning: WBI Energy evaluated a number of potential routes and facility alternatives for the Project. For the route as currently planned, WBI Energy completed a detailed review of publicly available data, aerial photography, topographic maps, and ground reconnaissance to identify routing constraints and opportunities. Based on environmental and engineering considerations, existing corridor collocations, and landowner discussions, WBI Energy selected the planned pipeline route and facilities that have been used to initiate discussions with stakeholders. As WBI Energy continues engagement with landowners and other stakeholders, WBI Energy will continue to refine the route and planned facilities. Environmental and cultural survey results will help determine if additional route adjustments are needed.

Open Houses: WBI Energy plans to hold open houses along the planned route in February 2026 upon consultation with FERC staff. Additional information on WBI Energy's open houses is provided in the Public Participation Plan provided in Exhibit D. WBI Energy held invitational

landowner information meetings in November 2025 as described in the Land/Right-of-Way section above.

Engineering and Environmental Subcontractors: WBI Energy is engineering the Project, conducting centerline and civil surveys, and will prepare aerial photo-based alignment sheets for the Project. WBI Energy has contracted with Burns and McDonnell Engineering Company, Inc. (Burns and McDonnell) to provide engineering, environmental, and permitting support services, environmental field surveys, and to support stakeholder engagement activities.

Biological Field Surveys: WBI Energy consulted FWS's Information for Planning and Consultation (IPaC) system to identify federally listed threatened and endangered species in the counties crossed by the Project. Based on IPaC results and conversations with the FWS, USFS, and BLM, WBI Energy determined that sensitive species habitat surveys would be required for the Dakota skipper and the western regal fritillary in select locations across the Project route. WBI Energy will hold conference calls with these agencies in December 2025 to discuss appropriate field surveys and survey protocols. WBI Energy conducted wetland, waterbody, general habitat field surveys, and sensitive species habitat surveys beginning in June 2025. Additional surveys will be conducted in the summer of 2026 or in accordance with survey windows identified by the agencies.

Cultural Resources Field Surveys: On several occasions between February and August 2025, WBI Energy conducted research at the State Historical Society of North Dakota to identify previously recorded cultural resource sites along and near the planned Project facilities. Additionally, WBI Energy has initiated correspondence with the North Dakota State Historic Preservation Office to discuss field methods for cultural resources field surveys. WBI Energy prepared a scope of work for the field surveys which was approved by the State Historical Society of North Dakota and field surveys began in June 2025. In September 2025, WBI Energy submitted an Archaeological Resources Protection Act (ARPA) cultural resources permit application to the district archaeologist at USFS, Dakota Prairie Grasslands, and a fieldwork authorization request to BLM, North Dakota Field Office. The Grasslands ARPA permit and BLM fieldwork authorization request were approved by the agencies in September 2025.

8. Third-Party Consultant Proposals (18 C.F.R. § 157.21(d)(9))

WBI Energy plans to hire and fund a third-party environmental consultant to prepare the NEPA document for the Project. WBI Energy submitted a draft Request for Third-Party Proposal for FERC staff's review in December 2025 and will begin soliciting proposals from potential third-party contractors in December 2025. WBI Energy will submit the third-party contractor proposals to FERC in January 2026 and anticipates FERC will select a third-party contractor prior to FERC's initiation of scoping, which WBI Energy anticipates will begin in March 2026.

9. Acknowledgment: Complete Environmental Report and Complete Application Required at the Time of Filing (18 C.F.R. § 157.21(d)(10))

WBI Energy acknowledges that a complete Environmental Report and a complete Certificate application are required at the time of filing its application.

10. Public Participation Plan Details (18 C.F.R. § 157.21(d)(11))

WBI Energy's Public Participation Plan is attached as Exhibit D.

11. Submittal to U.S. Coast Guard of Letter of Intent and Preliminary Waterways Suitability Assessment (18 C.F.R. § 157.21(d)(12))

Not applicable. The Project does not involve an LNG facility.

WBI Energy respectfully requests that the Director issue a Notice commencing the pre-filing process by the end of December 2025. Should you have any questions about this request, please feel free to contact the undersigned at (701) 530-1563.

Sincerely,

/s/ Lori Myerchin

BAKKEN EAST PIPELINE PROJECT

Public Participation Plan

WBI Energy Transmission, Inc. (WBI Energy) is committed to open and honest stakeholder engagement throughout the entirety of the Bakken East Pipeline Project (Project). WBI Energy views maintaining good relations with landowners and other stakeholders as an integral part of responsible business conduct and recognizes that stakeholder engagement requires listening and being responsive as well as sharing information.

For the Bakken East Pipeline Project, the Public Participation Plan will continue through all phases of the Project and will:

- Inform landowners and other stakeholders about the Project through early public notification and regular communication;
- Share fact-based, accurate information;
- Communicate transparently about the proposed construction and operation of facilities, including potential impacts; and
- Provide timely opportunities for interested stakeholders to pose questions or express concerns. WBI Energy will take such input into consideration and, where feasible, let stakeholders know how their input influenced the Project.

As a company, WBI Energy will work in good faith with stakeholders to identify and address issues early and proactively. The project team (including specialists in land, routing, engineering, construction, and other key areas), will plan and implement this program, supported where appropriate with the use of strategic external resources.

Elements of the program include:

1. Identifying stakeholders with whom WBI Energy will communicate about the proposed Project and any potential impacts;
2. Establishing a website presence, a Project e-mail address, a toll-free Project phone number, and a Project mailing address for stakeholders to contact WBI Energy;
3. Conducting consultation calls and/or in-person meetings with state and federal agencies, elected officials and community leaders;
4. Hosting invitational landowner information meetings;
5. Hosting open house meetings for stakeholders and interested public;
6. Producing and distributing informational materials; and
7. Supporting on-going outreach throughout the life of the Project.

Stakeholder Identification

WBI Energy has gathered stakeholder contact information for elected officials and staff (local, state, and federal), community leaders, tribal leaders, landowners, and state and federal agencies associated with the Project. The contact information will be maintained in a database for use in distribution of information about the Project (fact sheets, letters of invitation, introductory letters, etc.).

Exhibit D

Public Participation Plan

BAKKEN EAST PIPELINE PROJECT

Point of Contact

A toll-free number, e-mail address, and mailing address have been established to facilitate stakeholder communication with the project team and to provide a way for stakeholders without internet access to reach the project team for information:

Toll-free number: 1-888-451-1119

E-mail address: Contact@WBIEnergy.com

Mailing Address: WBI Energy Project
c/o Burns & McDonnell
9400 Ward Parkway
Kansas City, MO 64114

Website

In addition to the toll-free number, e-mail address, and mailing address, WBI Energy has established a Project website: www.wbienergybakkeneast.com.

The website will be updated throughout the duration of the Project, and may provide information including:

- Project Overview
- Project Fact Sheet
- Project Map
- Project Schedule
- Routing
- Safety
- Land
- Regulatory Compliance
- Construction and Restoration
- Safety
- Answers to Frequently Asked Questions (FAQs)
- Supplemental materials used at meetings
- Contact information
    - Project toll-free number
    - E-mail address
    - Mailing address
    - Media contact

BAKKEN EAST PIPELINE PROJECT

Community Leader Outreach

WBI Energy has and will continue to communicate with identified community leaders, including local, regional, and federal officials, and tribal leaders, along the proposed route. Follow up phone calls or one-on-one meetings have and will continue to be conducted with community leaders.

WBI Energy will continue to identify and conduct further outreach with other stakeholders, including emergency responders, throughout the duration of the Project.

Responses to Requests from Federal and State Permitting Agencies

WBI Energy has identified the federal and state agencies with regulatory review or permitting authority for the Project and have or will be conducting initial consultation meetings with them. Additionally, WBI Energy will respond to requests for information from these agencies in a timely manner, providing the most up-to-date information available. Exhibit B of the pre-filing request contains the list of agencies identified.

Landowner Meetings

WBI Energy has contacted landowners potentially impacted by the proposed Project and hosted seven (7) invitational landowner meetings in November 2025 to provide initial information and answer questions about the Project. Landowners were invited via a letter that was mailed on October 7, 2025. Project details were shared and the project team will use comments about the proposed route from landowners as part of the planning process. Below is a list of dates and locations of the landowner meetings.

DATE	LOCATION
Mon., Nov. 3	Watford City, ND
Tues. Nov.4	Killdeer, ND
Wed. Nov. 5	Buelah, ND
Mon. Nov. 17	Bismarck, ND
Tues. Nov. 18	Ellendale, ND
Wed. Nov. 19	Jamestown, ND
Thur. Nov. 20	Casselton, ND

Open Houses

WBI Energy plans to host seven (7) open houses in the Project area. The open houses will be scheduled for February 2026 in Watford City, Killdeer, Beulah, Bismarck, Ellendale, Jamestown, and Casselton, North Dakota during the evening hours. Structured to foster one-on-one discussions with the subject-matter experts, the open houses will provide interested community members with the opportunity to gain insight about the Project, as well as share their concerns. Project maps and informational materials will be distributed. Feedback from participants will be

documented and integrated into the Project route selection process. The open house venues and times will be communicated in the following manner:

- Letter of invitation - stakeholders will receive a letter of invitation, including agency representatives, elected officials, and other community groups; and
- On the Project website.

Informational Materials

WBI Energy will enhance outreach efforts by developing printed materials tailored to address the questions and concerns of stakeholders. This will include material such as a fact sheet, FAQs, maps, and a landowner civil and environmental survey brochure distributed through direct mail, at the landowner meetings, at the open houses, at individual meetings, on the Project website, and by request. Updates may be sent to landowners and stakeholders at appropriate Project milestones.

Ongoing Stakeholder Outreach

WBI Energy will conduct proactive outreach throughout the Project with all interested stakeholders, including landowners, elected officials, tribal and community leaders, and media. WBI Energy has established a database and tracking system to document stakeholder contacts and issues in a timely manner.
